Announcement of Competition

Social Innovation Faculty Research Grants

Proposals Due: Friday, October 14, 2016

This Request for Proposals (RFP) announces a faculty research grant competition to fund social innovation research that improves the quality of life for residents of low-income, urban communities. Funding is available beginning January 1, 2017.

A limited number of one-year grants will be made. Grants will not normally exceed $25,000, however, larger grants will be considered. Funds must be expended on or before December 31, 2017. Approximately, $100,000 is available.

BACKGROUND
The Sol Price Center for Social Innovation was established at the University of Southern California in 2011 by a generous gift from Price Philanthropies to name and endow the Sol Price School of Public Policy. The gift honors the life and legacy of the late Sol Price, Price Club founder and business entrepreneur who was committed to addressing social justice and poverty.

Since 1993, Price Philanthropies has invested more than $200 million in a redevelopment effort to improve City Heights San Diego for its current residents. The initiative employs a holistic, place-based approach, addressing the principal factors that contribute to urban poverty.

In recognition of that commitment, the gift also created the USC Sol Price Center for Social Innovation. The Price Center seeks to become the leading academic institution in the field of social innovation by developing ideas, practices, and leaders to enhance the quality of life for people in low-income urban communities worldwide.

FOCUS AND ELIGIBILITY
USC tenure-track and full time faculty may apply. The RFP invites applications to undertake research on novel solutions to challenges facing low-income urban communities. The proposed studies could range in topic from social finance to social entrepreneurship and from social movements to innovative social programs that might involve new models of collaboration. Research projects could involve the evaluation of outcomes, the development of new models of evaluation of social innovation, a quantitative assessment, or document the process of social innovation.
Successful applicants may be eligible for competitions in later years, contingent upon satisfactory completion of the current project. However, each separate application should encompass a well-defined, self-contained program of research.

FUNDING GUIDELINES AND RESTRICTIONS

Eligible expenditures include:
- Directly related travel and accommodation
- Faculty summer stipend (subject to the University's fringe benefit charge and standard withholdings). Requests for release time during the academic year must be approved by the relevant dean and be justified in terms of the proposed research objective. The request and approval for course release should be part of the application packet.
- Faculty with 12-month appointments may charge their grant-related effort with approval of their dean.
- Salary support for Graduate Research Assistants and other student wages including tuition.
- Collection and purchase of archival materials
- Ethnographic and survey research (including software, data sets, etc.)
- Materials and supplies

Ineligible expenses include:
- Large equipment expenditures (greater than $750)
- Expenditures supplementing or offsetting direct or indirect costs of related projects
- Indirect costs

Note that conservative and cost-effective budgets are strongly encouraged. Funding for students is encouraged in all projects.

ASSESSMENT

A faculty panel will review proposals according to a range of criteria including:
- Consistency with the Sol Price Center for Social Innovation RFP and mission
- Innovation and research significance
- Likelihood of continued external funding
- Qualifications to perform work within the time frame specified
- Reasonableness of budget and cost-effectiveness

Special consideration may be given to projects that include City Heights as a study area (see Appendix A). Due to limited resources, some projects may be funded for less than the requested amount.

The Price Center will make final project selections, taking into account faculty referee reports, programmatic priorities and prior project performance.
PRINCIPAL INVESTIGATOR RESPONSIBILITIES
Successful applicants will be appointed as FELLOWS of the Sol Price Center for Social Innovation for the duration of their projects.

The principal investigator will be responsible for the successful execution and timely completion of the proposed research. Awardees are responsible to submit:

1) An academic working paper. The Center may use the working paper to produce a policy brief accessible to the general public. If so, the PI(s) will be asked to review and revise the brief before publication
2) A final report providing a summary of project results as well as publications, external funding leveraged or applied for, and presentations based on the research.
3) One presentation of research at a seminar or conference organized by the Price Center.

Any publication or creative endeavor arising from work supported by the Price Center should acknowledge support from the USC Sol Price Center for Social Innovation. Please submit copies of publications to the contact person below.

APPLICATION PROCEDURE
Proposals should be succinct and clearly written. Proposals are limited to no more than 7 pages, not including abbreviated CVs and dean’s course release approval, if appropriate. Each proposal must be submitted in MS-Word format and include the following elements:

1. Cover Page (use attached cover sheet)
2. An abstract of up to 100 words and a proposal narrative not to exceed four-pages of single-spaced, 12 point, Times New Roman typescript with one-inch margins.
3. Detailed budget (use attached Budget Form)
4. General timetable of work to be performed
5. A two-page NSF bio-sketch that includes professional appointments, degrees awarded, as well as, key related publications and grants for PI and co-PIs.

The entire application package should be emailed to the contact person whose address is given below.

DEADLINES
October 14, 2016 Proposals Due
November 30, 2016 Announce Decisions
January 1, 2017 Funds available
June 30, 2017 Brief progress report
December 31, 2017 Deadline for expenditure of grant funds and brief progress report
December 31, 2018 Deadline for receipt of final report

CONTACT PERSON
Inquiries may be directed to Richard Parks, executive director, at (213) 740-8181 or richard@usc.edu.
Appendix A: City Heights

City Heights is a vibrant urban community east of downtown San Diego consisting of 16 defined neighborhoods. Approximately 74,000 people live in a 4 square mile area, making it the most dense community in the San Diego region. A significant number (42.4%) of residents are foreign born with a majority migrating from Latin America, Asia and Africa. Only 63% of adults have a high school diploma, 33% are not English fluent, and 27% live in poverty.

City Heights Boundaries. Blue: City Heights Community Planning Area. Green: Primary Focus Area

In 1994 Sol Price became interested in City Heights as a result of a newspaper article about a Vons grocery store closing in the community. At the time City Heights had the highest crime rate in San Diego County, gang activity and drug dealing were rampant, housing was substandard and public services were lacking. Sol and former City Councilman William Jones had been working together to open a retail store in an inner city neighborhood in San Diego. Believing that the Vons store might be a good site, they soon learned that the City of San Diego had already secured the site for a new police substation, but didn’t have financing in place. Sol Price made an agreement with San Diego City Manager Jack McGrory whereby Sol would loan the City the money for the building construction if the City would agree to repay the loan in a timely manner and design into the building a gymnasium for police employees and the public to use, public meeting rooms and windows on the street side of the substation. The purpose of these facility additions was to make the substation as community friendly as possible. The City agreed and the project was completed less than two years later.

While working on the development of the police substation, Sol and William decided that Sol would focus on non-profit work in City Heights while William would focus on for profit real estate development. The “City Heights Initiative” was conceived as a holistic approach to the revitalization of an urban community. The Initiative focuses on improving housing, retail, healthcare, education, social services, public safety, job opportunities, and other quality of life issues and services.
