The following is a reference tool that highlights some of the important USC policies related to sponsored projects. Please refer to this guide both in the proposal preparation stage and throughout the course of your research.

Contact the Office of Research (http://research.usc.edu/, or 213-740-6709), for any general questions on research within USC, and contact the Office of Compliance (http://ooc.usc.edu/, or 213-740-8258) for any general questions on research compliance.

I. Proposal Submission

All externally sponsored contracts and grants proposals must be submitted through the Department of Contracts and Grants. To facilitate this process, USC is developing TARA (Total Access for Research Administration), a web-based system that will streamline how proposals are developed, approved, and submitted to sponsors, as well as how accounts are managed after award. TARA will be fully deployed in the summer of 2014. Until TARA is complete, DCG proposals should be accompanied by the Proposal Approval Record (“PAR”), available at the Department of Contracts and Grants website (http://research.usc.edu/dcg/). Industry sponsored clinical trial proposals are submitted through the True 2.0 system.

For further information on submitting proposals, contact the Department of Contracts and Grants (213) 740-7762 (University Park Campus), or (323) 442-2396 (Health Sciences Campus).

A. Who May Be an Investigator

All tenured, tenure track, and non-tenure track faculty, and research scientists (with the exception of lecturers, adjunct, and part-time clinical faculty) may act as Principal Investigators. Postdoctoral Research Associates and Postdoctoral Teaching Associates, as defined by USC’s Postdoctoral Scholars Policy, may act as co-principal investigators on sponsored projects, but may not be principal investigators unless a specific waiver and approval is granted upon recommendation by the Department and approval of the appropriate Dean. To review the Postdoctoral Scholars Policy, please visit http://postdocs.usc.edu/files/2011/09/Postdoctoral-Scholars-Policy-rev-9-19-11.pdf.

B. Institutionally Limited External Competitions

Some grant competitions sponsored by outside agencies restrict the number of applicants a university can nominate. In such cases, potential applicants must go through an internal review process and receive approval from USC administration prior to submission to the sponsoring agency. Deadlines for USC internal reviews are typically a month or more in advance of the sponsoring agency’s own deadlines.

Researchers intending to apply for an institutionally limited competition should contact the Office of Research at (213) 740-6709 as soon as an announcement is released.

Further information on institutionally limited competitions can be found at http://research.usc.edu/for-investigators/funding/competitions/.

C. Regulatory Research Committees

If your proposal is subject to review by a regulatory research committee, committee approval is required before research can commence and before an account is established. Investigators should contact the applicable committees before, or soon after, a proposal is submitted, to avoid delays in starting research. The Department of Contracts and Grants is authorized to restrict access to an award until all necessary approvals are obtained. The USC regulatory research committees are as follows:

- Human Subjects: Institutional Research Board (IRB). The IRB oversees research involving a living individual about whom an investigator conducting research obtains: (1) data through intervention or interaction, or (2) identifiable private information. Visit
• Stem Cells (Adult or Embryonic): **Embryonic Stem Cell Research Oversight Committee (SCRO)**. The SCRO provides oversight of all issues related to the derivation and use of stem cells, including but not limited to Human Embryonic Stem Cell (hESC) research. Contact David Hinton: dhinton@usc.edu or visit [http://research.usc.edu/policies/scro/](http://research.usc.edu/policies/scro/).

• Animals: **Institutional Animal Care and Use Committee (IACUC)**. The IACUC oversees procedures related to research and testing of animals. Visit [www.usc.edu/hsc/dar/iacuc/forms/](http://www.usc.edu/hsc/dar/iacuc/forms/), or call (323) 442-1689.

• Biological Agents and Regulated Carcinogens: **Institutional Biosafety Committee (IBC)**. The IBC is responsible for oversight of the use of all potentially hazardous biological agents, including infectious agents, human and non-human primate materials, known regulated carcinogens, recombinant DNA and studies involving human gene transfer. Visit [http://capsnet.usc.edu/LabSafety/BioSafety](http://capsnet.usc.edu/LabSafety/BioSafety), call (323) 442-2200, or e-mail IBC@caps.usc.edu.

• Radioactive Materials: **Radiation Safety Committee (RSC)**. The RSC is responsible for ensuring that radioactive materials and radiation-producing devices are used safely and in accordance with State and Federal regulations. Visit [http://capsnet.usc.edu/LabSafety/RAD](http://capsnet.usc.edu/LabSafety/RAD), or call (323) 442-2200.

• Select Agents (as identified at [http://www.selectagents.gov/](http://www.selectagents.gov/)): **Institutional Biosafety Committee (IBC)**. Approval must be obtained from the IBC prior to receiving or using any Select Agent in isolated form above exempt quantities. Visit [http://capsnet.usc.edu/LabSafety/BioSafety/SelectAgentProgram/index.cfm](http://capsnet.usc.edu/LabSafety/BioSafety/SelectAgentProgram/index.cfm), (323) 442-2200, or e-mail IBC@caps.usc.edu.

D. Conflicts of Interest in Research

Any potential conflict of interest related to your research must be identified in PAR forms when submitting a proposal for external support, and also in the iStar system when submitting a protocol for review by the IRB or the IACUC. You must also fully disclose the potential conflict through “diSClose”, USC’s on-line disclosure system. Research cannot commence until a decision is made by the **Conflict of Interest Review Committee (CIRC)**, which may require that you follow a conflict management plan. Conflicts that arise during the course of research must be disclosed when they first appear, and also require an approved management plan. In the case of a conflicting outside relationship that starts after the research has begun, the outside relationship cannot commence until the CIRC makes a decision. Call the Office of Compliance at (213) 740-8258 for further information.

Investigators supported by Health and Human Service (HHS) agencies (such as NIH, AHRQ and CDC) are required to submit an annual disclosure of all financial interests related to their institutional responsibilities at USC via diSClose. Annual disclosures must be updated between June 1st and July 31st each year. Additional updates may be required when changes occur during the year. Investigators are not permitted to submit proposals unless their disclosures are up to date and required training has been completed.

Background: [http://ooc.usc.edu/conflict-interest-research](http://ooc.usc.edu/conflict-interest-research)
Policy: [http://policies.usc.edu/p4acad_stud/conflic_interest_research.html](http://policies.usc.edu/p4acad_stud/conflic_interest_research.html)
E. Conflicts of Interest in Professional and Business Practices including Conflicts of Commitment

A university employee’s primary professional loyalty is to the university. A conflict of interest and ethics arises when financial or other personal considerations compromise, or have the appearance of compromising, an individual’s professional judgment and ability to perform his or her responsibilities to USC. A conflict of commitment arises when an employee’s outside activities conflict with or appear to conflict with his or her responsibilities to USC. Either type of conflict must be disclosed through your supervisor and Dean. FAQs and Resources follow. You may click below for further information or call the Office of Compliance at (213) 740-8258.

Background: [http://ooc.usc.edu/conflict-interest-professional-and-business-practices](http://ooc.usc.edu/conflict-interest-professional-and-business-practices)
Policy: [http://policies.usc.edu/p2admOpBus/coi-professional_business_practices.html](http://policies.usc.edu/p2admOpBus/coi-professional_business_practices.html)

F. Institutional Conflicts of Interest

USC’s Institutional Conflict of Interest (ICOI) policy addresses instances where the financial interests of the University have the potential to cause bias in the conduct of research. Such conflicts occur most frequently in situations where a research project provides a direct benefit to an outside entity through evaluation, validation, trial or test of an invention, product, drug, service, or technology, and the University holds a financial interest in the outside entity. An institutional conflict is considered “significant” if a research project involves human subjects and the university: (1) holds any private equity in the outside entity; (2) has the potential to receive cash payments from existing licensing arrangements with the outside entity; or (3) maintains an ownership interest or an entitlement to equity in a publicly-traded sponsor of human subjects research as a result of technology licensing activities.

Institutional conflicts that are not significant are managed through disclosure of the University’s relationship with the outside entity in all publications, proposals, consent documents, and presentations. Significant conflicts are presumed to be unacceptable unless compelling circumstances are present that justify allowing the research to proceed at the University despite the presence of the conflict.

Background: [http://ooc.usc.edu/institutional-conflict-interest-research](http://ooc.usc.edu/institutional-conflict-interest-research)
Policy: [http://research.usc.edu/files/2011/05/InstitutionalConflict090109.pdf](http://research.usc.edu/files/2011/05/InstitutionalConflict090109.pdf)

G. Export Controls

The U.S. Government maintains two primary sets of export control regulations that may impact university research. The Export Administration Regulations (“EAR”) regulate exports of commercial items with potential military applications (so called “dual-use” items). The International Traffic in Arms Regulations (“ITAR”) regulate exports of items and services specifically designed for military applications.

In addition to these export control regulations, university activities also may be subject to the U.S. Government’s economic sanctions against certain countries, entities and individuals. These economic sanctions programs are administered by the Treasury Department’s Office of Foreign Asset Controls (“OFAC”).
USC does not restrict participation in research to United States citizens, nor does it accept restrictions on a researcher’s ability to share the results of his or her research freely. If you become aware that a sponsor is seeking to restrict participation or publication (other than short review periods to ensure that no confidential or proprietary information has been inadvertently disclosed in an intended publication), please contact the Contracts and Grants Officer assigned to your award and the Office of Compliance at (213) 740-8258. You may also review more detailed information regarding Export Control regulations on the Office of Compliance website at http://ooc.usc.edu/export-controls.

H. **Cost Sharing**

Cost sharing occurs whenever any portion of project costs are provided at USC’s expense rather than at the expense of the sponsor. Mandatory cost sharing is required by the sponsor as a condition of the award, while voluntary cost sharing is not.

There are two kinds of voluntary cost sharing. Voluntary **committed** cost sharing is committed prior to acceptance of the award -- either at the time a proposal is submitted or during budget negotiations. Voluntary **uncommitted** cost sharing is not proposed or budgeted for in a sponsored agreement. It generally occurs when research personnel donate additional time above that proposed to the sponsor or agreed to as part of the award.

If a cost sharing commitment is quantified in the proposal or award, regardless of whether it is mandatory or voluntarily committed, the commitment must be identified and approved in writing by the Dean of the relevant school(s) or unit(s) prior to submission of a proposal or acceptance of the award. If the committed cost sharing arises during the conduct of the supported activity, the Principal Investigator must notify his or her Dean and obtain written approval as well. After the appropriate approval is obtained, the portion of compensation that is cost-shared should be charged to an appropriate school, unit or departmental cost sharing account. Call the Office of Financial Analysis at (213) 821-1937 for further guidance.

Costs deemed as unallowable by the sponsor, including any salary above a salary cap cannot be cost shared. These costs must also be charged to an unrestricted school, unit or departmental account.

Background:  http://research.usc.edu/dcg/proposal-development/cost-sharing/
Policy:  http://policies.usc.edu/p2admOpBus/cost-sharing.html

I. **Graduate Student Tuition Remission**

Graduate students participating in research projects may receive a reasonable amount of support (tuition remission and other support) on the basis of the student’s participation in a sponsored project. Tuition remission is considered an allowable direct charge for most sponsors, provided that: (1) the student is conducting activities necessary to the sponsored agreement; (2) tuition remission is consistently provided in a like manner to students in return for similar activities conducted in non-sponsored as well as sponsored activities; and (3) during the academic period, the student is enrolled in an advanced degree program at USC and the activities of the student in relation to the sponsored project are also related to the degree program in which the student is enrolled.

The NIH has established a funding cap that limits the amount it awards for a combination of graduate student salary and tuition remission. This cap is determined through reference to the National Research Service Award (NRSA) stipend in effect at the time the grant award is issued. The cap in effect at the
time the proposal is submitted applies to the entire life of the competitive segment of the project. Current NRSA levels are posted at http://grants.nih.gov/training/nrsa.htm.

Tuition charges should be assigned to research grants and other funding sources in proportion to the graduate student’s salary allocation during the nine-month academic year.

J. **Reimbursement Rates**

Information on reimbursement rates for indirect costs and fringe benefits may be obtained at the Department of Contracts and Grants website (http://research.usc.edu/dcg/proposal-development/rates-at-a-glance/). Current minimum graduate assistant and postdoctoral scholar stipend rates may be found at https://research.usc.edu/files/2011/05/Minimum-Salaries-for-GRAs-and-Postdocs-6-12.pdf.

K. **Responsible Conduct of Research (RCR) Training Requirements**

The National Science Foundation requires USC to certify at the time of proposal submission that it has a plan to provide appropriate training and oversight in the responsible and ethical conduct of research to undergraduates, graduate students, and postdoctoral researchers who will be supported by the NSF to conduct research. USC is also responsible for tracking and verifying that the training requirement has been satisfied. USC faculty applying for NSF support do not need to develop their own, separate plan to meet this requirement when proposing to the NSF. Students and postdoctoral scholars supported by NIH training grants are required to complete a live training course. These are offered by individual schools.

Details on USC’s RCR program can be found at: http://research.usc.edu/policies/rcr/.
II. Award and Account Establishment

The Department of Contracts and Grants (including its Clinical Trials Office) negotiates the terms of all sponsored research agreements with external sponsors.

A. Pre-Award Costs/Advanced Funding

Pre-award costs and advanced funding enable investigators to incur costs on a sponsored project before the university has actually received award funds.

Pre-award costs are used for costs incurred up to 90 days before the official start date of an award, but only where there is a programmatic justification to do so.

Advanced funding is used to incur costs after the official start date of the award, but prior to the university actually receiving the award funds.

Both pre-award costs and advanced funding require authorization from the investigator’s dean (school of primary appointment), because the Dean’s account is at risk until the award is received. For further information, visit the Department of Contracts and Grants website at http://research.usc.edu/dcg/, or call (213) 740-7762 (University Park Campus), or (323) 442-2396 (Health Sciences Campus).

B. Award and Account Creation

Upon award acceptance, the Department of Contracts and Grants processes the award and identifies an account number in Kuali Coeus (KC). Once finalized, an Award Synopsis is available, which contains a summary of the terms and conditions of the award. It is important to review the Award and its terms and conditions to understand your obligations. Once processed in KC, Sponsored Projects Accounting then establishes the account for the sponsored project in the University’s financial system, KFS. Until the account is established, the PI cannot charge costs against the award. For further information on award establishment, visit the Department of Contracts and Grants website at http://research.usc.edu/dcg/, or call (213) 740-7762 (University Park Campus), or (323) 442-2396 (Health Sciences Campus) For more information on account establishment, visit the Sponsored Projects Accounting website at http://fbs.usc.edu/depts/spa/page/6742/policies-information/, or call (213) 740-5381.

C. Division of Overhead for Multi-School Projects

In instances involving collaboration between researchers in more than one school, the master account should be established in Lead Unit, the unit responsible for the oversight and monitoring of the award. The Lead Unit is typically in the school of the Principal Investigator’s primary appointment. Satellite accounts should be established in the school of the co-investigator(s) primary appointment so that indirect costs may be allocated in proportion to the research costs accrued in that school. For further information on how to establish a satellite account, visit Sponsored Projects Accounting website at http://fbs.usc.edu/depts/spa/page/6742/policies-information/, or call (213) 740-5381.
III. After Research Commences

A. Effort Reporting

Faculty and research staff are responsible for reporting and certifying percentage effort charged to a sponsored project in a timely manner. Certification includes making corrections and adjustments if there are differences between estimates and actual effort. All twelve-month faculty and exempt employees must certify their effort quarterly, while all nine-month faculty and RA’s must certify their effort once each semester. Non-exempt staff effort is certified bi-weekly via the university’s time keeping systems. The Principal Investigator is responsible for confirming that the faculty and staff members working on the sponsored project have certified promptly and that the time and effort charged appear reasonable.

To assist in the completion of effort reporting, USC has implemented a web-based effort certification system called eCert, through which all effort may be certified. eCert is accessed through SCera, USC’s Electronic Research Administration Portal, which may be found at http://aisportal.usc.edu/fis/portal/.

Certification processes are overseen by USC’s Office of Financial Analysis. Visit http://fbs.usc.edu/depts/ofa/, call (213) 821-1937, or contact your own department coordinator for further guidance. Specific guidance on effort reporting can be found at http://ooc.usc.edu/effort-reporting.

B. Cost Transfers

A cost transfer is a mechanism used to transfer payroll and non-payroll transactions from one sponsored account to another when a sponsored account was erroneously charged. Cost transfers should be made within 90 days of when the error is discovered, and no later than 15 days after the termination date of the budget period. All cost transfers must be fully documented. USC’s Sponsored Projects Accounting (SPA) oversees the cost transfer process. Visit http://fbs.usc.edu/depts/spa/, or call (213) 740-5381 for more information.

C. Subrecipient Monitoring

All subcontractors must sign a subcontract that includes a detailed statement of work. Investigators should monitor subcontractors to ensure that they are complying with the terms of the award. These monitoring duties include confirming that the subcontractor is satisfying the statement of work, and that the invoices submitted by the subcontractor are reasonable, allocable, and allowable on the project. For assistance on issues related to subrecipient monitoring, please contact the Department of Contracts and Grants (http://research.usc.edu/dcg/) or the Office of Financial Analysis (http://fbs.usc.edu/depts/ofa/).

D. Program Income

Program income is gross income earned by a grantee that is directly generated by the project or activity or earned as a result of the award, other than income resulting from royalties or licensing fees. All program income must be reported on the financial status report.

E. Use of Consultants

Before an independent contractor (e.g. consultant) provides professional advice or service that will be paid for by a sponsored project account, the PI and Department must confirm allowability and ensure
compliance with the terms and conditions of the award. If allowable, the requisition can be processed through USC eMarket and routed to the Department of Contracts and Grants for approval.

Furthermore, for sponsored-project funded independent contractor projects, Business Services (Purchasing Services and Disbursement Control) is required to perform a cost analysis on each independent contractor’s proposed pricing to confirm reasonableness. If costs proposed by the independent contractor are significantly higher than the cost analysis, the independent contractor cannot be engaged until further review.

University faculty are not eligible to receive compensation for consulting within the university.

F. Expenses and Purchases

All expenses and purchases funded by a sponsored project account must directly and fully benefit the project. Furthermore, all expenses and purchases funded by a sponsored project must comply with the sponsor’s guidelines. For example, international travel funded by a sponsored project must comply with the Fly America Act. For information regarding a sponsor’s guidelines and/or restrictions on an Award, please reference the Award and terms conditions in Kuali Coeus.

G. Interdepartmental Consulting

Faculty time should be budgeted for inter-school projects in the same manner that faculty time is budgeted for single school projects. There should be no distinction between the way a faculty member is compensated for a project that involves a single school from a project that involves multiple schools. In particular, interdisciplinary research, even in the form of interdepartmental consulting on a sponsored project, is not an overload activity and is considered part of a faculty member’s regular workload and compensation. Please contact the Office of Financial Analysis (http://fbs.usc.edu/depts/ofa/; (213) 821-1937 for additional guidance.

H. Recharge Centers and Specialized Service Facilities

USC schools, academic departments, and other university divisions may establish Recharge Centers and Specialized Service Facilities to provide goods and/or services to university activities, programs, and organizations. In some instances, they are established to provide specialized services to a few users, such as animal care facilities, but they may also be used to provide commonly used goods or services, such as telecommunications centers or computer centers. A Specialized Service Facility usually provides services involving the use of complex or highly-specialized services. Recharge Centers are expected to use CORES software to bill charges to accounts.

Regardless of which type of facility is established, billing rates must be designed to recover no more than the allowable cost of goods and services provided. In addition, all users, including those supported by federal awards, must be billed at the same rate for similar goods and services.

The Office of Financial Analysis (http://fbs.usc.edu/depts/ofa/; (213) 821-1937) provides guidance and oversight to assist in the establishment of such facilities and costing assistance to ensure that services provided are charged in an appropriate manner. For more information click below.

Background:  http://fbs.usc.edu/depts/ofa/page/5643/rechargeservice-centers/
I. **When to Notify Regulatory Research Committees**

Investigators must inform regulatory research committees of any changes that relate to studies under their jurisdiction, such as:

- Adverse events
- Changes to study personnel
- Protocol changes
- Changes in funding sources

If you are unclear as to whether to report a change, consult the applicable committee.

J. **When to Update Conflict of Interest Disclosure**

Any change in a financial or other interest related to research must be updated in diSClose and disclosed to the CIRC, regardless of whether a disclosure was made at the outset of the research. These include changes in the:

- Percentage of ownership in outside entities with a financial interest in research;
- Amount of consulting performed on behalf of an outside entity;
- Role of an investigator in an outside entity (i.e., from consultant to managerial role).

K. **Material Transfer Agreements**

A Material Transfer Agreement (MTA) is a research contract between a provider and a recipient of research materials which governs the terms and conditions under which the research material may be used. MTA’s protect the intellectual and other property rights of the provider, and may also address issues such as publication, limitation(s) on the use of the research materials, inventions and results from the use of the research material, indemnification, and liability issues.

USC Stevens is responsible for reviewing MTAs to ensure compliance with these requirements, and acting as the authorized university representative for purposes of signing the MTA. Please visit USC Stevens at [http://stevens.usc.edu/have_mta.php](http://stevens.usc.edu/have_mta.php) for further guidance.

L. **Non-Disclosure Agreements**

Non-disclosure agreements are permitted in limited circumstances as a necessary step toward initiating funded research projects or licensing technology. USC Stevens is responsible for reviewing NDAs related to licensing and the Department of Contracts and Grants is responsible for NDAs related to sponsored research.

M. **NIH Public Access Policy**

The NIH Public Access Policy mandates that journal articles that arise from NIH funding be submitted to PubMed Central for open access upon acceptance by the journal. Also, all NIH applications, proposals, and progress reports must include the PubMed Central reference number when citing an article that is authored or co-authored by the investigator, or arose from the investigator’s NIH award. It is important to comply with this requirement to ensure that your research can continue to be funded by NIH.
For further information on how to comply with this requirement, please visit NIH website at http://publicaccess.nih.gov/index.htm, or the Norris Medical Library website at http://www.usc.edu/hsc/nml/lib-information/nih.html.

N. Audits

If you receive oral and/or written notice from a sponsor or other outside agency that it intends to conduct an audit or any other type of review of your sponsored project, please immediately contact the Office of Financial Analysis at (213) 821-1937, or the Office of Compliance at (213) 740-8258.
IV. Closeout

A. Reporting

Investigators are required to satisfy all final reporting requirements, which include notifying the sponsor that the research has been completed, submitting final reports, and disclosing project results and expenditures.

A copy of the final report should be submitted to the Department of Contracts and Grants, along with the completed Final Patent Report, if applicable. Required reports can be identified in the terms and conditions of the Award.

USC’s Sponsored Projects Accounting (SPA) office is charged with fiscal oversight of the project closeout process. Visit http://fbs.usc.edu/depts/spa/, or call (213) 740-5381 for more information.

B. Intellectual Property

Under USC’s Intellectual Property policy (http://policies.usc.edu/p4acad_stud/intellectual_property.pdf) and consistent with both federal and state laws, all intellectual property (e.g., patentable inventions) resulting from government and industry sponsored projects, or from substantial use of university resources, must be disclosed to USC Stevens. USC Stevens assists faculty, staff and students with intellectual property matters in several ways, including obtaining and maintaining patents, identifying potential licensees and partners, consulting on start-up activities and strategies, and negotiating related agreements. In addition, USC Stevens provides services for transferring technologies to other non-commercial and non-profit research institutes. Visit http://stevens.usc.edu/, or call (213) 821-5000 for more information.
V. Scientific Integrity

The Office of Compliance offers an on-line course as part of its Grants Management Education program that emphasizes research integrity issues, such as conflict of interest, scientific misconduct, peer review, data management and mentoring. You may access the course at http://ooc.usc.edu/registration.

Investigators are expected to conduct research with the highest ethical standards. Allegations of plagiarism, fabrication, and falsification are taken seriously. USC’s policy on scientific misconduct (http://ooc.usc.edu/scientific-integrity) defines the university process for investigations into such allegations.

A. Data Management

Data can include laboratory notebooks, notes, preliminary analyses, as well as any other records that are necessary for the reconstruction and evaluation of results of research, regardless of the form or media on which they are recorded. Generally speaking, USC owns all research data created in the course of research conducted at the university.

The National Science Foundation requires all funded projects provide a data management plan to facilitate sharing of research data, and the National Institutes for Health requires data management plans for larger projects. Resources on creation of data management plans can be found at https://research.usc.edu/dcg/proposal-preparation/.

B. Authorship

Generally speaking, authorship credit should be given to those who have made significant contributions to the conception and design, or analysis and interpretation of data, or both; to drafting of the manuscript or revising it critically for intellectual content; or on final approval of the manuscript. Principal authorship and other publication credits should accurately reflect the relative scientific or professional contributions of the individuals involved, regardless of their relative status. The USC Academic Senate has implemented standards for authorship and attribution of research products, which can be found at http://www.usc.edu/academe/acsen/Documents/Resolutions/URC_on_Authorship_and_Attribution_passed%20with%20resolution.pdf.
VI. Education Requirements

A. Kuali Financial System Training

Certain applications within the Kuali Financial Systems (KFS) require mandatory training. Training resources as well as an overview and user guides are all available. For further details, go to http://fbs.usc.edu/depts/kuali/page/3549/about-usc-kuali/.

B. Grants Management Education

All principal investigators, co-investigators and research administrators must complete one of the two courses in Grants Management Education program to obtain access to sponsored projects funds or the budget administration system. To register, go to http://ooc.usc.edu/grants-management-education-program.

C. Responsible Conduct of Research (RCR)

USC’s RCR course for undergraduates, graduate students, and post-docs is provided by CITI (Collaborative IRB Training Initiative) for NSF supported projects and in-person for NIH projects. For more information on how to access the course, contact the Office of Compliance at (213) 740-8258 or complian@usc.edu. Details on USC’s RCR program can be found at http://research.usc.edu/policies/rcr/.

D. Conflict of Interest in Research

All researchers who propose or conduct research sponsored by the Department of Health and Human Services (NIH, CDC, HRSA) must complete training at least once every four years regarding conflicts of interest in research. USC offers on-line training on the requirements of federal regulations and USC policy, as well as on diSClose, USC’s on-line disclosure system. Details on training can be found at http://ooc.usc.edu/conflict-interest-research.

E. Human Subjects Education

All key personnel engaged in human subjects research must complete the CITI on-line human subjects education course. Go to: http://www.usc.edu/admin/oprs/citi.html, or contact the Office for Protection of Research Subjects at (213) 821-1154, or oprs@usc.edu.

F. Animal Use

All Principal Investigators, staff, and students working in laboratory animal facilities and/or handling animals or animal tissues must complete initial training and yearly refresher training thereafter, by the Department of Animal Resources. Visit www.usc.edu/hsc/dar/, or call (323) 442-1689.

G. Radiation Safety

All individuals who work with or in the vicinity of radioactive material or radiation-producing machines must undergo appropriate training. This training is required by the Radiation Safety Committee and administered by Environmental Health and Safety. Visit http://capsnet.usc.edu/LabSafety/RAD, or call (323) 442-2200.
H. Institutional Biosafety

All investigators and laboratory personnel who engage in research involving potentially hazardous biological agents, including but not limited to infectious agents, human and non human primate materials (including established cell lines), known regulated carcinogens, select agents, recombinant DNA and studies involving human gene transfer must undergo appropriate training. This training is required by the Institutional Biosafety Committee and administered by Environmental Health and Safety. Visit http://capsnet.usc.edu/LabSafety/biosafety, or call (323) 442-2200.

I. Research Advancement

The Office of Research offers courses in grantsmanship, including specialized courses on proposal writing for foundations, corporations, NIH, and Department of Defense. Information can be found at http://research.usc.edu/for-investigators/training/, or call 213-740-6709.

J. GCP

The Office for Protection of Research Subjects (OPRS) administers training in how to adhere with Good Clinical Practice (GCP) standards, which are the international, ethical, and scientific standards expected in design, conduct, performance, monitoring, auditing, recording, analysis, and reporting of clinical trials. Compliance with GCP provides regulators assurance that data are reported, results are credible and accurate, and that the rights, safety, confidentiality, and well-being of trial subjects are protected. Beginning January 1, 2010, GCP training is required for all USC PIs and Key Personnel conducting Full Board clinical trial research. For more information, please visit http://www.usc.edu/admin/provost/oprs/training/gcp.html.

K. Research Administrators Forum (RAF)

The RAF, which meets approximately three times per year and is sponsored by the Office of Compliance, provides research administrators from both campuses an opportunity to network and share information related to research administration and compliance, discuss issues and learn about university policies and procedures as well as changes in laws and regulations that may apply to them. The RAF was established in response to a recommendation from faculty and staff members to give administrators more opportunities to share experiences with peers and learn about the research administration issues that affect their job responsibilities.

Anyone interested is encouraged to attend. Please call the Office of Compliance at (213) 740-8258 or email compliant@usc.edu to be added to the invitation list.
