

Rose Hills Awards				
Year	Type	Proposal Title	PI	School
2014	New	Can increased use of urban vegetation and “cool” roofs and pavements counter the effects of future climate change while simultaneously improving air quality in Los Angeles?	George Ban-Weiss	Viterbi School of Engineering
2014	New	Comprehensive dissection of example higher-order genetic interactions	Ian Ehrenreich	Dornsife College of Letters, Arts and Sciences
2014	New	Novel mechanisms of heterochromatic DNA repair and genome stability	Irene Chiolo	Dornsife College of Letters, Arts and Sciences
2014	New	Dynamics of Electron and Proton Motion in Artificial Photosynthesis	Jahan Dawlaty	Dornsife College of Letters, Arts and Sciences
2014	New	Manipulation of the Microbiome to Prevent Colorectal Cancer	R. William DePaolo	Keck School of Medicine
2015	New	Optogenetic approaches to understanding and restoring touch sensation	Andrew Hires	Dornsife College of Letters, Arts and Sciences
2015	New	Small organisms with a large climate footprint: the impact of marine nitrogen and sulfur cycling on the global climate	Naomi Levine	Dornsife College of Letters, Arts and Sciences
2015	New	Defining the role of genomic instability in basal-like breast cancer metabolism	Nicholas Graham	Viterbi School of Engineering
2015	New	Computational Model to Identify Novel Therapeutic Targets that Inhibit the Metabolism of Pancreatic Cancer	Stacey Finley	Viterbi School of Engineering
2015	Renewed	Can increased use of urban vegetation and “cool” roofs and pavements counter the effects of future climate change while simultaneously improving air quality in Los Angeles?	George Ban-Weiss	Viterbi School of Engineering
2015	Renewed	Comprehensive dissection of example higher-order genetic interactions	Ian Ehrenreich	Dornsife College of Letters, Arts and Sciences
2015	Renewed	Novel mechanisms of heterochromatic DNA repair and genome stability	Irene Chiolo	Dornsife College of Letters, Arts and Sciences
2015	Renewed	Dynamics of Electron and Proton Motion in Artificial Photosynthesis	Jahan Dawlaty	Dornsife College of Letters, Arts and Sciences
2015	Renewed	Manipulation of the Microbiome to Prevent Colorectal Cancer	R. William DePaolo	Keck School of Medicine
2016	Renewed	Optogenetic approaches to understanding and restoring touch sensation	Andrew Hires	Dornsife College of Letters, Arts and Sciences
2016	Renewed	Small organisms with a large climate footprint: the impact of marine nitrogen and sulfur cycling on the global climate	Naomi Levine	Dornsife College of Letters, Arts and Sciences
2016	Renewed	Defining the role of genomic instability in basal-like breast cancer metabolism	Nicholas Graham	Viterbi School of Engineering
2016	Renewed	Computational Model to Identify Novel Therapeutic Targets that Inhibit the Metabolism of Pancreatic Cancer	Stacey Finley	Viterbi School of Engineering
2017	New	Coupled Geomechanical Modeling of Modulation in Mid-Crustal Seismicity in Nepal Himalaya Induced by Seasonal Hydrological Loading	Birendra Jha	Viterbi School of Engineering
2017	New	Protection of Oligodendrocytes by Mas Receptor signaling in models of Multiple Sclerosis	Eve Kelland	Keck School of Medicine of USC

2017	New	Molecular regulation of epicardial cell fate transition in cardiac injury repair	Jian Xu	Ostrow School of Dentistry
2017	New	Expanding hematopoietic stem cells with artificial niche stromal cells	Keyue Shen	Viterbi School of Engineering
2017	New	Engineering a Human Skeletal Muscle Model of Duchenne Muscular Dystrophy	Megan McCain	Viterbi School of Engineering
*no call for 2016. Only renewals were granted.
