

## NewsFlash!

**Announcement:** Cayuse 424 will be unavailable this **Saturday, August 15**, from 8:00 A.M. to 8:00 P.M. (PDT) to allow for major upgrades to the system hardware. Cayuse has provided the following information about this upgrade:

"Production hardware servers have reached EOS (End of Support) and can no longer be maintained in the long term. Migrating to the new fleet of servers and storage subsystems will allow us to better serve our customers through higher performance and server resiliency. Due to the effort involved, we will need extra time to successfully move customer environments into the new locations.

During the maintenance window, all parts of the Research Suite will be unavailable, but all existing records will be preserved and no action will be necessary on the part of any end user. You will see NO visible changes to the system other than improved performance in some areas of the Research Suite. We appreciate your understanding as we work to make our Research Suite stronger, faster, and more reliable than ever before."

**Questions?** If you have any questions, please contact the [Contracts and Grants Officer](#) assigned to your unit.
