

NewsFlash!

Announcement: On Saturday 4/21/2018, starting at 8:00 A.M. and likely continuing until 5:00 P.M., several business systems residing in the ITS data center will be moved to new equipment. This hardware migration is intended to improve system stability and performance.

Because several interconnected systems (including ServiceMix) will be off-line during the hours stated above, you will likely be unable to access most business systems throughout that day. Some of the systems that will be unavailable are:

- Workday
- Kual Financial System
- TARA/Kuali Coeus
- BI/Cognos Reports
- Cayuse
- Laserfiche
- USC eMarket

ITS personnel and IT partners will be working that day to test the various affected systems and address any problems that might arise during the migration.

Questions? Please reach out to your [DCG Officer](#) if you have any questions.
