

NewsFlash!

As we approach the start of our next academic year, please take a moment to view USC's online resources that support research.

- **Guide to Research at USC:** Written for faculty and research administrators, the guide summarizes USC processes for sponsored research, research ethics and training (attached).
- **Center for Excellence in Research:** Hard-copy fall schedules are in the mail for faculty training in research funding and research practices. You may also [view the schedule online](#).
- **Innovation Resources for Faculty:** Download [this document](#) to learn about USC support for the transition of university research for public benefit, or consult <https://research.usc.edu/innovation/> or <https://stevens.usc.edu/>.
- **Digital.usc.edu:** Provides a library of resources and services that support open scholarship, through creation, cataloguing, communication and collaboration for research products.
- **Funding Opportunities:** The Office of Research offers many services to [search for external funding](#). These include: **Grant Forward**, to search for solicitations by topic and sponsor; **Dimensions**, to obtain data by department, institution or individual on publications, patents and funded research; **Wizehive** application portal, required for any institutionally limited funding opportunity, as well as for funding programs within USC.
- **Diversity and Inclusion in Research:** The [website](#) contains: USC's strategic plan for diversity in research; resources for studying diversity in society, diversity in health and community centered research; and information on how USC is building diversity within its research community.

To learn more about priorities and future directions, visit the Office of Research [Strategic Planning](#) page. You may also review the detailed results of USC's [Research Culture Survey](#), conducted earlier this year.

We appreciate you forwarding this Newsflash to applicable USC faculty.
